

ZAIN WAHBI

COMPUTER ENGINEER

Mesyaf,Hama,Syria | eng.zainwahbi@gmail.com | github.com/Zain-Wahbi | linkedin.com/in/zain-wahbi-858897413

SUMMARY

Computer Engineer with hands-on experience in PHP/Laravel web development and Machine Learning. Skilled in building RESTful APIs, data analysis with Python, and applying ML models for real-world problems. Passionate about clean code and continuous learning.

PROFESSIONAL SKILLS

Backend PHP · Laravel · RESTful APIs
Frontend (Basic) HTML · CSS · JavaScript · Tailwind
Data & ML Python · Pandas · Scikit-learn · Random Forest · XGBoost · LightGBM
Database MySQL · SQL
Tools & Principles Git · GitHub · OOP · SOLID Principles

PROJECTS

Todo App API (GitHub) May 2026
• Built RESTful API for task management using Laravel

ShopAPI (GitHub) June 2026
• Built a full production-ready e-commerce REST API using Laravel
• Implemented Laravel Sanctum authentication, Stripe payment integration
• Used queues for email notifications via Mailtrap

Financial Fraud Detection (Graduation Project) February – July 2026
• Trained and compared ML models (Random Forest, XGBoost, LightGBM, TabNet) on a 5M-record Kaggle dataset
• Achieved AUC ~0.99 using threshold tuning and class weighting techniques
• Built a FastAPI backend serving 4 endpoints (health, predict, batch predict, explain)
• Implemented a full preprocessing pipeline: feature engineering, label encoding, imputation, and sender/receiver lookup tables
• Integrated rule-based explainability system to identify fraud risk factors per transaction

Airline Company Management System – Web Application April – June 2025
Semester Project – Computer Engineering Department
• Developed a dynamic airline management website using PHP and MySQL.
• Designed modules for flight scheduling, booking management, aircraft and customer data handling.
• Implemented search and filter functions for efficient data navigation.
• Conducted testing and optimization to enhance system performance and usability.

EDUCATION

Bachelor of Computer Engineering

September 2021 – July 2026

Al-Wataniya Private University – Faculty of Engineering

- Bachelor's degree in Computer Engineering specializing in software development, including PHP-based web applications, Java programming, and database management systems.

ADDITIONAL INFORMATION

- **Languages:** Arabic(Native), English (Strong in writing and comprehension, average speaking skills).

- **Certifications:**

Web Development:

- Mastering Laravel Framework and PHP — Coursera
- Building Web Applications in PHP — Coursera(University of Michigan)
- JavaScript, jQuery, and JSON — Coursera(University of Michigan)

Data & Analytics:

- Data Analysis with Python — Coursera(IBM)
- Introduction to Data Analytics — Coursera(IBM)
